CLAIMS

1. (Previously Presented) An active-matrix addressing LCD device comprising:

a panel including an active-matrix substrate, an opposite substrate, and a liquid crystal layer sandwiched by the active-matrix substrate and the opposite substrate, the active-matrix substrate having data lines, scanning lines that intersect with the data lines at intersections, pixels arranged near the respective intersections, and TFTs arranged as switching elements for the respective pixels;

a source driver circuit for driving the data lines;

a gate driver circuit for driving the scanning lines; and
